

Lab Experiment-07

7.Perform basic video processing operations on the captured video. Read captured video in python and display the video, in slow motion and in fast motion.

Code:

```
!pip install opencv-python
import cv2, time
from google.colab import files
from google.colab.patches import cv2_imshow
uploaded = files.upload()
file = list(uploaded.keys())[0]
def play(speed):
    cap = cv2.VideoCapture(file)
    while cap.isOpened():
        ret, frame = cap.read()
        if not ret:
            break
        cv2_imshow(frame)
        time.sleep(speed)
    cap.release()
print("Normal Speed")
play(0.03)
print("Slow Motion")
play(0.1)
print("Fast Motion")
play(0.005)
```

Output:

Normal Speed

Slow Motion

Fast Motion
