

Lab Experiment-09

9. Implement the image scaling techniques to resize the images to both bigger and small sizes

Code:

```
!pip install opencv-python
import cv2
from google.colab import files
from google.colab.patches import cv2_imshow
f = files.upload()
file = list(f.keys())[0]
img = cv2.imread(file)
small = cv2.resize(img, None, fx=0.5, fy=0.5)
big = cv2.resize(img, None, fx=2, fy=2)
cv2_imshow(img)
cv2_imshow(small)
cv2_imshow(big)
```

Output:
