

Lab Experiment-15

15. Perform basic Image Handling and processing operations on the image is to read an image in python and detect the corners in the image using Harris Corner Detection function

Code:

```
!pip install opencv-python
import cv2
import numpy as np
from google.colab import files
from google.colab.patches import cv2_imshow
f = files.upload()
file = list(f.keys())[0]
img = cv2.imread(file)
gray = cv2.cvtColor(img, cv2.COLOR_BGR2GRAY)
gray = np.float32(gray)
corners = cv2.cornerHarris(gray, 2, 3, 0.04)
img[corners > 0.01 * corners.max()] = [0, 0, 255]
cv2_imshow(img)
```

Output:
